A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Murakami, according to Figs. 2-5, shows an optical apparatus (see Fig. 4) , which is used for recording information data on a recording medium (see Fig. 2) having pre-pits (12) formed at predetermined periodic intervals, comprising: a memory (142) for storing information data to be recorded on the recording medium (11) and supplying the information data in synchronism with a clock signal outputted from circuit 130; a pre-pit signal reproducing circuit (29) for detecting the pre-pits (12) to generate a pre-pit signal; a phase-locked-loop circuit (131) for generating the clock signal which is phase-locked with a jitter component contained in the pre-pit signal; and recording device (140, 121, 112) for recording the information data supplied from the memory (142) on the recording medium (11) as recited in an apparatus claim 8 and corresponding functional operation method claim 9.

***Allowable Subject Matter***

5. Claims 1-7 are allowed over the prior art of record because the prior art of record, considered in combination or individually, fails to teach or suggest an information data recording apparatus including a combination of : a unit length signal generator and a memory relatively operated in combination with a pre-pit signal reproducing circuit, a phase-locked loop and a recording means as particularly recited in claim 1, lines 7-16. Claims 2-7 are allowed with their parent claim 1.
